

MASTERS RESEARCH TEACHER VIDEOS

A series of four 15-minute programmes, sponsored by NUT CPD Programme, is now available on the Teachers Media website: www.teachersmedia.co.uk

The series reports on a pioneering CPD project which enabled teachers to collect visual evidence to explore teaching and learning issues of their choice and have their analysis of that evidence accredited at Masters' level. The project was organised within a professional learning partnership agreed between the University of Cumbria and the National Union of Teachers' Continuing Professional Development (CPD) Programme. The programmes are intended to encourage the wider use of 'teacher video' as a stimulus to professional development and the enrichment of professional dialogue in schools.
