

Every child deserves the best

Invest, don't cut

Government spending cuts mean

- class sizes up
- less individual attention for children
- fewer subject choices for your child
- teachers and support staff being cut or not replaced.

The NUT and ATL have launched
www.schoolcuts.org.uk

Visit the site to find out how
much your local school faces losing under this
Government's funding policies.

Education – invest don't cut

Biggest cuts in a generation

Schools and colleges are already under severe strain. Now, the Institute for Fiscal Studies says that the biggest real terms cuts to per pupil funding in a generation are on the way.

Government is increasing costs

The Government says it is protecting education funding. This isn't true. In reality they are FREEZING the cash they give TO our schools and colleges, so that inflation cuts its value, whilst INCREASING what they take FROM them in pensions and NI contributions.

Listen to parents and teachers

We say it's time for the Government and all political parties to listen to parents and to teachers. It's time for all of us to Stand Up For Education.

The effect on children's education

These increased costs are leading to big cuts affecting children. In a recent NUT survey, 70% of heads said that lack of funding was affecting standards.

Wrong priorities

Any responsible Government would be dealing with the real problems facing our education system – funding and the teacher recruitment crisis.

But instead of dealing with these, this Government is ploughing on with costly plans to make every school an academy, some schools grammars and the rest secondary moderns.

Education – for all our children

Our new website shows the impact of Government cuts
